DETAILED ACTION

Remarks

This Office action is responsive to applicant's amendment filed on October 10, 2006.

Claims 8-13 are pending.

Claim Rejections - 35 USC § 102 and 103

The rejection of claims 8, 9 and 11-13 under 35 U.S.C. 102(b) based on Carolan et al. (U.S. Pat. 5,750,279) has been withdrawn.

The rejection of claim 10 under 35 U.S.C. 103(a) based on Carolan et al. and Larminie et al. (Fuel Cell Systems Explained, 2nd ed.) has been withdrawn.

In withdrawing this ground of rejection, the examiner acquiesces with applicant's assertion that Carolan et al. that the first and second braze alloys [170] are coupled to two dielectric elements [140, 142].

Allowable Subject Matter

Claims 8-13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the instant invention regarding bringing together as an assembly a dielectric element, a paste of a first braze alloy, a paste of a second braze alloy and first and second components such that the paste of the first braze alloy is disposed between and in contact

Art Unit: 1745

with the first component and the dielectric component and the paste of the second braze alloy is disposed between and in contact with the second component and the dielectric component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Pat. 4,467,018 to Schroll teaches ceramic gaskets [54, 56] sandwiching an impermeable electrical resistive, i.e. dielectric member [52]. See col. 4 line 4 et seq.
